Prepared by the World Analysis Branch, International Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were John C. Dunmore III, Thomas A. Warden, and Thomasine B. McCall. Mary L. Fant provided statistical support. David Gatton provided word processing and table formatting support. Editorial support was provided by Linda L. Hatcher, Research Information Branch, Economics Management Staff. Data processing support was provided by Sharlan Lindow and William Meiller, International Economic System Branch, Data Services Center, and Penni Korb, World Analysis Branch.

## Digest

### U.S. Agricultural Export Values Increase Despite Lower Volume (see p. 2).

U.S. agricultural exports climbed to \$35.1 billion during the first 11 months of fiscal year 1984 (October 1983-August 1984), 10 percent above those for the same period in 1983, despite lower volumes in some products. Volumes and values for feed grains, wheat, and cotton increased, but volume declined for soybeans and soybean products. Exports probably reached \$38 billion by the end of fiscal year 1984 (which ended September 30) compared with \$34.8 billion in 1983.

### U.S. Agricultural Imports Continue Strong Pace (see p. 54). Increased demand and higher prices expanded U.S. farm product imports to \$17.3 billion during the first 11 months of fiscal year 1984, a 16-percent gain over those of the same period in 1983. Coffee, cocoa, rubber, tea, sugar, fruits and vegetables, vegetable oils, wine, malt beverages, live swine, and pork contributed to the gain. Brazil, Canada, Mexico, Indonesia, and Australia supplied most of the imports.

### Dollar Surges in July, Moderates in August (see p. 77). The U.S. dollar appreciated strongly against most major currencies during July, then held those gains during the slow trading month of August. Rising interest rates and rapid U.S. economic growth gave the U.S. dollar most of its boost. Sluggish economic growth in Western Europe placed little pressure on credit markets there.

### U.S. Agricultural Exports to Latin America Up in 1984, May Drop in 1985

(see p. 81). Higher prices for most grains and oilseed products and strong inventory buildups in Mexico and Venezuela drove U.S. farm product sales to Latin America up to at least \$5.2 billion in fiscal year 1984, a \$300-million gain over 1983's value. Although remaining a solid market for U.S. agricultural products, Latin America's buying in fiscal year 1985 may slip half a billion dollars.

# U.S. Agricultural Export Values Increase Despite Lower Volume

U.S. agricultural exports climbed to \$35.1 billion during the first 11 months of fiscal year 1984 (October 1983-August 1984), 10 percent above those for the same period in 1983, despite lower volumes in some products. There were increased volumes and values for feed grains, wheat, and cotton, but volume declined for soybeans and soybean products. Exports probably reached \$38 billion by the end of fiscal year 1984 (which ended September 30) compared with \$34.8 billion in 1983.

The world economic recovery, led by the United States, and crop shortages in some countries helped boost U.S. farm product sales in 1984. A continued strong dollar, foreign debt problems in many developing countries, and subsidized competitor exports affected U.S. agricultural exports during fiscal year 1984 and will continue into fiscal year 1985.

## U.S. Wheat Exports Improve

U.S. wheat exports during the first 11 months topped 35 million tons, 5 percent ahead of those for the same period in 1983, mainly reflecting the recent surge in shipments to the Soviet Union. U.S. wheat exports probably exceeded 40 million tons in fiscal year 1984, up 9 percent from those of 1983. Recently reduced crop forecasts in the USSR and a number of exporting countries could mean somewhat brighter export prospects for U.S. wheat in 1985.

Canadian Grain Shortage Could Expand U.S. Exports. Canadian wheat and barley harvests fell substantially during 1984. The wheat crop in the Prairie Provinces could have dropped 27 percent from that of the same period in 1983. The reduced grain crop, combined with lower beginning stocks, will shrink exportable supplies. The shortage could mean increased export opportunities for U.S. wheat in fiscal year 1985, as Canada struggles to meet the import needs of its traditional customers and its grain supply commitment to the Soviet Union.

Wheat Exports to China Higher. U.S. wheat exports to China during the first 11 months of fiscal year 1984 accelerated to 4 million tons compared with 1.9 million tons during the same period in 1983. In contrast to wheat exports in 1984, the United States exported no corn to China during the 11-month period due to large domestic supplies there.

## U.S. Feed Grain Exports Rise

U.S. feed grain exports during the first 11 months rose 5 percent to 51.5 million tons valued at \$7.6 billion, a 30-percent increase over those of the same period in 1983. However, the corn exports continued to lag, and fiscal year 1984 will be below last year's 47.5 million tons.

U.S. Feed Grain Production Rebounds. U.S. feed grain supplies will improve considerably in fiscal year 1985 from the depressed 1984 level but still remain well below the record set in 1983. In contrast, foreign production in 1985 may only match 1983/84's, partially due to the forecast for a sharply reduced Soviet grain harvest. As a result, U.S. feed grain exports in fiscal year 1985 are expected to rise sharply above the 55- to 56-million-ton forecast for 1984.

U.S. Grain Sales to the Soviet Union Exceed Minimum. Poor weather conditions in the Soviet Union probably reduced the 1984 grain crop to about 170 million tons. Soviet grain imports could total a record 50 million tons in fiscal year 1985, with around one-third from the United States. During the first 11 months of fiscal year 1984, the Soviet Union had already exceeded the minimum purchase of corn and wheat required under the U.S./USSR long-term grain agreement, including 5.5 million tons of wheat and 6.3 million tons of corn.

U.S. Grain Sorghum Sales to Mexico Boom. U.S. grain sorghum exports during the first 11 months surged 16 percent ahead of year-earlier levels to more than 5.5 million tons. The major export markets include Mexico, Japan, Israel, Spain, and Venezuela. Mexico's coarse grain import needs have increased because of a short domestic crop. Mexico may have imported 3.3 million tons of sorghum in fiscal year 1984, mostly from the United States.

#### Soybean and Meal Exports Remain Depressed

Values for U.S. oilseed and product exports may have increased to around \$9 billion in fiscal year 1984, but volumes probably fell substantially, especially for soybeans and soybean meal. Soybean and soybean meal export volumes during the first 11 months dropped 19 and 21.5 percent, respectively, from year-earlier levels. Demand in the EC, the major market for U.S. soybean meal, remained depressed despite lower soybean meal prices compared with those of a year earlier. U.S. soybean meal exports likely reached 5 million tons in fiscal year 1984 compared with 6.4 million in 1983.

#### Cotton Exports Advance

The outlook for U.S. cotton exports for fiscal year 1984 remains bright. U.S. cotton exports at 1.4 million tons during the first 11 months exceeded those of the same period in 1983 by 34 percent. Production problems for major competitors, such as the Soviet Union and Pakistan, have helped the United States increase its share of the world market to around 35 percent. (Pat Haslach, World Analysis Branch)

# U.S. Agricultural Imports Continue Strong Pace

Increased demand and a strong dollar in foreign markets for many farm products expanded U.S. agricultural imports to \$17.3 billion during the first 11 months of fiscal year 1984 (October 1983-August 1984), up 16 percent over those of the same period in 1983. Both noncompetitive and competitive commodities, principally sugar, coffee, tea, rubber, fruits, vegetables, live swine, pork, vegetable oils, wine, malt beverages, and cocoa products, contributed to value increases.

Farm product imports in July reached \$1.8 billion, their highest monthly level since April and 30 percent higher than those of July 1983. Imports during August, however, dropped to less than \$1.6 billion. Larger domestic supplies reduced import demand for beef, tobacco, cocoa beans, and live cattle. U.S. agricultural imports from developing nations, accounting for 59 percent of total farm product imports from all areas, totaled \$10.3 billion compared with \$6.6 billion from developed nations. Brazil is the single largest source of U.S. farm product imports, followed by Canada, Mexico, Indonesia, Australia, Colombia, the Philippines, France, and the Netherlands.

## Noncompetitive Imports Expand

Noncompetitive product imports at \$6.1 billion moved 22 percent higher during the first 11 months than those in the same months during 1983. Increases in coffee, tea, rubber, bananas, and cocoa products more than offset value declines in cocoa beans.

Coffee, Cocoa Products, Rubber, and Bananas Gain. Coffee imports totaled \$3 billion in the 11-month period, up \$456 million from year-earlier values. Coffee import volume increased, and unit import prices rose from \$1.21 per pound in October 1983 to \$1.33 per pound in August 1984. Average monthly wholesale prices for Brazilian coffee in the United States increased from \$1.42 per pound in October 1983 to \$1.46 per pound in August 1984. Brazil, Colombia, Mexico, El Salvador, the Ivory Coast, Guatemala, Indonesia, Ecuador, and Uganda were the major suppliers.

Cocoa and product imports, led by chocolate preparations, increased 21 percent during the 11-month period to over \$937 million due to steeper import prices. Brazil and Ecuador were the major suppliers. However, volume fell 7 percent because of lower imports of cocoa beans. The New York cocoa futures price averaged 93 cents per pound in October 1983, but tighter supplies, a slight frost in Brazil, and a slowdown in Nigeria's shipments raised prices to 99 cents per pound in August 1984. Brazil, the Ivory Coast, the Dominican Republic, and Ghana were the major suppliers.

Increased U.S. industrial demand and higher prices escalated rubber imports 47 percent during the first 11 months, totaling \$785 million. Volume rose 22 percent to 740,000 tons. Indonesia and Malaysia shipped most of the U.S. rubber imports.

The value of other major noncompetitive imports also increased, especially bananas. U.S. banana imports advanced 9 percent in tonnage and 14 percent in value during the first 11 months of fiscal year 1984 to \$623 million. Bananas are the fourth largest noncompetitive import and come mostly from Latin America.

### Competitive Imports Up Despite Declines

Competitive imports advanced to \$11.2 billion during the first 11 months of fiscal year 1984, 13 percent above those of the same period in 1983, despite declines in some products.

Beef Down; Pork Up. Increased domestic red meat supplies lowered U.S. beef imports (accounting for 55 percent of all imported U.S. meat) to almost \$1.1 billion during the first 11 months, down 17 percent from those of the same period in 1983. Volume decreased 18 percent to 498,000 tons. Australia supplied about 42 percent of U.S. beef imports, and New Zealand shipped 21 percent. In contrast, higher import volumes pushed the value of pork up 8 percent to \$637 million during the 11-month period. Canned pork, mainly from Denmark, as well as fresh pork from Canada, gained sharply in volume.

Larger domestic supplies reduced U.S. cheese imports 1 percent to \$356 million from year-earlier values, but the volume, at 127,000 tons, increased 5 percent. Average monthly wholesale prices for cheddar cheese (40-pound blocks) decreased from \$172 in October 1983 to \$171 in August 1984. Western Europe and New Zealand shipped most of the imported cheeses. Weakened demand for tobacco imports dropped volume 23 percent during the first 11 months to 175,000 tons. Value fell 26 percent to \$518 million. Machine-threshed tobacco accounted for most of the sharp import decline, while filler grades from Brazil, Central America, Korea, and Thailand rose sharply.

Live cattle entries dropped to 773,000 head (\$270 million) during the first 11 months from 995,000 head (\$320 million) during the same period of 1983. Over 321,000 head of Canadian cattle entered the United States during the 11-month period, 21 percent fewer than the year-earlier entries. In contrast, swine entries from Canada rose sharply to over 955,000 head. Strikes at Canadian meatpacking plants in August resulted in the shipment of many hogs to U.S. processing plants.

### Sugar, Fruit, Vegetables, and Vegetable Oils Gain

Larger quota exemptions and re-exports increased U.S. sugar import value 25 percent to \$1.1 billion and volume 19 percent during the first 11 months. Imports totaled 2.7 million tons compared with 2.3 million tons during the same period in 1983. Import prices recovered during the 11-month period, averaging \$403 per ton compared with \$381 per ton during the same period in 1983. However, the wholesale U.S. sugar price in August 1984 averaged 22 cents per pound, the same as that of October 1983. The principal sugar suppliers were the Dominican Republic, the Philippines, Brazil, Argentina, Australia, and Guatemala. Fruit and preparation imports during the 11-month period rose 22 percent over year-earlier values to \$1.2 billion. Concentrated orange juice from Brazil and fresh grapes from Chile spurred the increase. Fruit juice imports increased 19 percent above year-earlier levels to 24.2 million hectoliters, with the value expanding 41 percent to \$585 million. Vegetable and preparation imports rose 24 percent to \$1.2 billion, as increases in canned mushrooms, peppers, olives, onions, and processed tomatoes more than offset declines for fresh tomatoes. Mexico supplies most fresh tomatoes, the major U.S. vegetable import.

Oilseeds and products reached a record \$726 million the first 11 months of fiscal year 1984, 55 percent more than 1983's value, mainly because of higher prices. Vegetable oils (mainly coconut and palm oils) accounted for most imports of oilseeds and products. Higher prices for palm and palm kernal oil slowed imports 1 percent to 226,000 tons. The Philippines supplied the bulk of the coconut oil, and Malaysia provided over 85 percent of the palm oil. (Charles E. Goode, World Analysis Branch)

Table 9--U.S. agricultural imports: Value (1,000 dol.) by country of origin,  
October-August 1982/83 and 1983/84, and August 1983 and 1984

| Region and country       | October-August |            |                   | August    |           |                   |

## Dollar Surges in July, Moderates in August

The U.S. dollar appreciated strongly against most major foreign currencies during July, then held those gains during the slow trading month of August. Of those currencies most important to U.S. agricultural trade, only the Canadian dollar managed to strengthen. Rising interest rates and rapid U.S. economic growth gave the U.S. dollar most of its boost.

### Interest Rates Up

High U.S. interest rates, compared with those in other countries, tend to increase the demand for dollars to purchase U.S. financial assets. Investors looking for high rates of return now turn first towards the United States. In addition, forecasts of higher U.S. interest rates for the remainder of 1984 encouraged acquisition of additional dollars for future increased returns, at what may seem to be current bargain prices.

Part of the belief that interest rates will remain high stems from the rapid growth of the U.S. economy. This growth is expected to continue to put pressure on credit markets, especially given the general belief among currency traders that financing requirements of the U.S. Treasury will actively compete to drive up the cost of borrowing.

### Canadian Dollar Advances

The rapid increase in interest rates payable in Canada boosted the Canadian dollar in July. Only the Canadian dollar can offer investors rates of return comparable with those in the United States. Inflation is moderate, and higher government borrowing is expected to raise interest rates. In addition, reports of current account surpluses have underpinned the Canadian dollar's rise. The Canadian election also encouraged individuals to purchase that currency.

### European Currencies Remain Weak

Major European monies remain poor alternatives to holding U.S. dollars. Rates of return, after adjustment for inflation, remain low compared with those in the United States. Sluggish economic growth in Western Europe placed little pressure on credit markets there. In addition, movements in interest rates on U.S. dollars tend to be partly mirrored in interest rates in Europe, with important differences. A rise in U.S. interest rates tends to raise similar rates for those available on European currencies but by a lesser amount; the advantage of holding dollars increases. A decline in U.S. rates is also generally followed by a smaller decrease in European rates, but compounding may offset the differential. As a result, the dollar rose during July relative to European currencies as U.S. interest rates advanced, but the decline in interest rates in August produced no corresponding fall in the value of U.S. currency. (David Stallings, World Analysis Branch)

## U.S. Agricultural Exports to Latin America

### Up in 1984, May Drop in 1985

Higher prices for most grains and oilseed products and strong inventory buildups in Mexico and Venezuela drove U.S. farm product sales to Latin America up to an estimated \$5.2 billion in fiscal year 1984 (which ended September 30), a \$300-million gain over those of 1983. Firm markets in Mexico, Venezuela, and most other countries supported the increases.

Wheat sales in 1984 remained about the same as those of 1983. The quantity delivered dropped slightly from 1983's 7.4 million tons because Brazil and other countries apparently were delaying some fourth-quarter (July-September) purchases until fiscal year 1985. Rice sales accelerated to \$100 million by the end of the third quarter (June 30), but total coarse grain sales for 1984 remained unchanged from 1983's \$1.3 billion because higher prices offset reduced shipments. Soybean sales, however, were the real surprise, as U.S. exports to Latin America climbed an estimated 30 percent over 1983's 1.3 million tons, in spite of exceptionally high prices and low stocks in the United States. Export tonnages of oilcake and vegetable oil dropped slightly in 1984, but the value of both increased over 1983's \$565 million.

U.S. agricultural exports to Latin America are expected to fall in fiscal year 1985 to about \$4.7 billion for three reasons. First, recent return of favorable weather throughout the region increased Latin American production in 1984 and into 1985, lowering demand for imports. Second, world prices for basic grains and oilseeds will fall, diminishing the aggregate value of U.S. export sales. Third, the inventory buildup expected in 1985 appears to have begun in 1984 in several countries, inflating 1984 volume slightly and diminishing projected 1985 import demand. Nevertheless, Latin America remains a solid market for about \$5 billion of U.S. agricultural products annually.

#### Mexico

U.S. agricultural exports to Mexico rose to an estimated \$1.9 billion in fiscal year 1984, largely due to recent increases in soybean and sorghum shipments. Increased foreign competition and improved prospects for Mexico's fall corn crop probably pushed wheat and corn exports down. The 1985 projections for U.S. agricultural exports to Mexico remain unchanged from the previous \$1.5 billion.

The Mexican economy is attempting to recover from 2 years of negative growth. Real gross domestic product grew an estimated 1 percent in fiscal year 1984. Huge foreign debt payments, greatly reduced public sector spending, and higher consumer prices on previously subsidized commodities are hampering a faster recovery. Mexican officials had hoped to improve the financial position in 1984 and 1985 by rescheduling a large portion of the public foreign debt, thereby alleviating current pressures to make payments and freeing up foreign exchange for needed industrial imports.

Mexican agricultural output remained strong in fiscal year 1984. Sufficient, timely rainfall increased hopes for above-normal crop yields. Irrigation should have been sufficient for most uses, especially wheat, cotton, soybeans, rice, and vegetables, because reservoir water levels were above normal most of the year.

Major crop output increased over 1983's levels, particularly for wheat, sorghum, cotton, and sugar. High prices and reduced real incomes continued to depress demand for livestock products. Increased forage irrigation should have helped rebuild the cattle herd which suffered two seasons of dry pastures.

Total Mexican imports dropped drastically in fiscal year 1984; however, soybean and sorghum imports reached larger than expected levels. Stock building appears to have been the motive for these larger imports in the face of depressed demand for livestock products, particularly pork, eggs, and milk, all heavy users of oilseed meals and coarse grains. Coarse grain (including corn) and soybean stocks for 1984 rose an estimated 1.1 million and 40,000 tons, respectively. The major supplier of these imports was the United States, taking all but 10 percent of the major coarse grain and oilseed market by the end of the third quarter. Argentina (sorghum, sunflowers, soybeans) and Brazil (soybeans) were the major competitors in these markets. But Canada, Australia, Thailand, and Costa Rica became the primary suppliers of cereal grains.

The United States remained the major Mexican supplier of hides, tallow, and powdered milk in 1984. By the close of the third quarter, the United States had shipped 33,000 tons of nonfat dry milk, 71,000 tons of inedible tallow, and 11.2 million cattle hides, valued at \$140 million, or 7 percent of total U.S. agricultural exports to Mexico.

#### Brazil

U.S. exports to Brazil in fiscal year 1984 rose an estimated 10 percent above 1983's \$400 million. These exports may stabilize in 1985 at about \$430 million. Wheat exports could expand modestly, and nonfat dry milk shipments will increase dramatically, almost offsetting reduced U.S. exports of coarse grains and cotton.

Brazil did not use a large portion of its 1984 Export Credit Guarantee Program (GSM-102) for wheat in fiscal year 1984. However, the United States approved use of the funds for wheat shipped in 1985, as long as the wheat was bought in 1984. Brazil has also requested an increase in its GSM-102 funding for 1985, which, if approved, would provide more than enough credit to cover the projected 2.5-million-ton purchase from the United States. Competition from Canada, Argentina, and Australia may continue to moderate U.S. exports to Brazil.

Brazil signed a 2-year concessional agreement to import 50,000 tons of U.S. nonfat dry milk. The United States exported about 15,000 tons in 1984 and will ship the balance in 1985. Brazil probably will not import significant quantities of coarse grains in 1985 due to improved corn production and slack feed demand. Larger harvests also may reduce Brazil's need to import cotton.

Brazil may maintain agricultural imports in 1985, despite better harvests, because it achieved greater than expected trade surpluses in 1984, easing the balance of payments problem. However, credit guarantees and concessional programs will likely continue to play an important role if the United States is to increase its exports to Brazil.

#### Venezuela

U.S. agricultural exports to Venezuela in fiscal year 1984 increased an estimated 29 percent over 1983's \$617 million, largely due to higher prices. Venezuela also appeared to be rebuilding inventories of basic commodities depleted by poor yields and import restrictions in 1983. Venezuela's imports in 1983 were well below its needs.

U.S. exports of livestock and animal products dropped dramatically in 1984, with beef and veal products falling sharply. Substitution of less expensive food items accounted for some of the decrease.

U.S. exports of wheat to Venezuela increased 18 percent by the third quarter of 1984, while corn sales increased 10 percent. Larger than expected volumes of grain sorghum were also sold. Oilseed and product exports to Venezuela in 1984 increased about 60 percent over 1983's value of \$213 million, with a rise of 158 percent in soybeans, including a 37-percent increase in unit price and an 88-percent increase in volume. A drop from fiscal year 1983's soybean oil exports reflected higher prices and the shift to sunflower oil imports which jumped 356 percent in volume and 466 percent in value.

#### Andean Region

U.S. agricultural exports to the Andean region, other than Venezuela, probably fell to about \$820 million in fiscal year 1984, down \$65 million from those of 1983. Chile had the sharpest cutback in U.S. imports because of a larger wheat crop and a stringent austerity program. The decline in U.S. farm product exports to Peru in 1984 is expected to continue in 1985. Colombia purchased near 1983's volume, while Bolivia and Ecuador continued to buy U.S. agricultural products to rebuild inventories depleted by emergency inventory reductions following crop failures in 1982 and 1983.

The region, however, is attempting to limit imports to protect its foreign credit until economic conditions improve. Nevertheless, wheat and coarse grain imports were still high in 1984. The value of oilseed products remained at 1983's level, with tradeoffs between raw soybeans and finished soybean products. The austerity programs in the region's countries lowered imports of livestock products, fruits and vegetables, sugar, and related products.

#### River Plate Region

U.S. agricultural exports to Argentina declined in fiscal year 1984. Further declines in fiscal year 1985 are expected because Argentina is primarily an agricultural exporting nation and sells grain and oilseed products in direct competition with the United States in world markets. Argentina's seed purchases from the United States remain firm. U.S. agricultural exports to Argentina are expected to fall to \$12 million in 1985. U.S. exports to Paraguay and Uruguay apparently are following similar trends.

#### Central America

U.S. agricultural exports to Central America in fiscal year 1984 probably increased at least 3 percent from the 1983 total of \$355 million. The increased demand for U.S. agricultural products, especially from Honduras, offset the 35-percent decline in exports to Nicaragua.

Wheat exports exceeded fiscal year 1983's sales of 78,700 tons because increases to the other countries in the region offset the loss of the Nicaraguan market. Coarse grain exports fell in 1984 due to improved harvests in El Salvador and Guatemala. Rice exports declined to an estimated 25,000 tons compared with 35,000 in 1983 because of better yields in several countries. The demand for vegetable oils and soybeans remained strong in 1984, but price increases diminished the potential for expanded U.S. sales in those products. U.S. agricultural exports to Central America in fiscal year 1985 are expected to equal or slightly exceed the estimated \$370 million for fiscal year 1984.

### Caribbean

U.S. agricultural exports to the Caribbean in fiscal year 1984 rose 8-10 percent over the 1983 total of \$773 million. Sales of grains, feeds, and oilseed products climbed slightly, while sales of livestock and animal products declined. Sales of processed vegetable and sugar products also moved up slightly, while other categories changed little.

Wheat and flour sales remained strong at the end of the third quarter as some buyers appeared to be buying more wheat and wheat products than they had in 1983. Prices increased less for these products than those for other grains. Wheat and wheat product sales for fiscal year 1984 reached an estimated 650,000 tons, valued at slightly more than \$110 million.

Rice sales climbed slightly over those of fiscal year 1983 because Guyana, a primary Caribbean supplier, has had problems delivering good quality rice to Jamaica and other Caribbean customers in recent years. Coarse grain exports rose 20,000-40,000 tons above the 568,000 tons sold in 1983. Feed and fodder totals appeared to be off slightly.

Oilseed and product sales totaled about \$130 million in fiscal year 1984, up \$10-15 million from those of a year earlier. Price increases for soybeans and vegetable oils drove the dollar value higher, even though soybean tonnages fell 20-30 percent. Vegetable oil and oilcake sales probably dropped slightly in fiscal year 1984.

The Caribbean countries are still buying the diverse products they need to maintain their dietary standards, but they are very price conscious and frequently substitute one commodity for another to hold import expenses down. However, chronic grain and cooking oil shortages force them to buy those products regardless of price increases. They also prefer to buy from the United States, so Caribbean orders of U.S. farm products are expected to increase slowly throughout the remainder of the eighties, a well-established trend in the seventies. U.S. concessional sales and trade preferences in this area make this region a stable market for U.S. farm products, as has been demonstrated in the last 3 years of worldwide economic crises. (John Link, Latin America Branch)

*More aggressive U.S. marketing and a redirection of trade programs already in place would help to close the gap with the European Community in the world market for high-value agricultural products (HVP's).*

*The potential payoff in closing that gap is impressive: If by 1990 the U.S. expanded its HVP exports by half again as much as the present level, it would gain an additional \$50 billion in GNP and an additional 1 million U.S. jobs.*

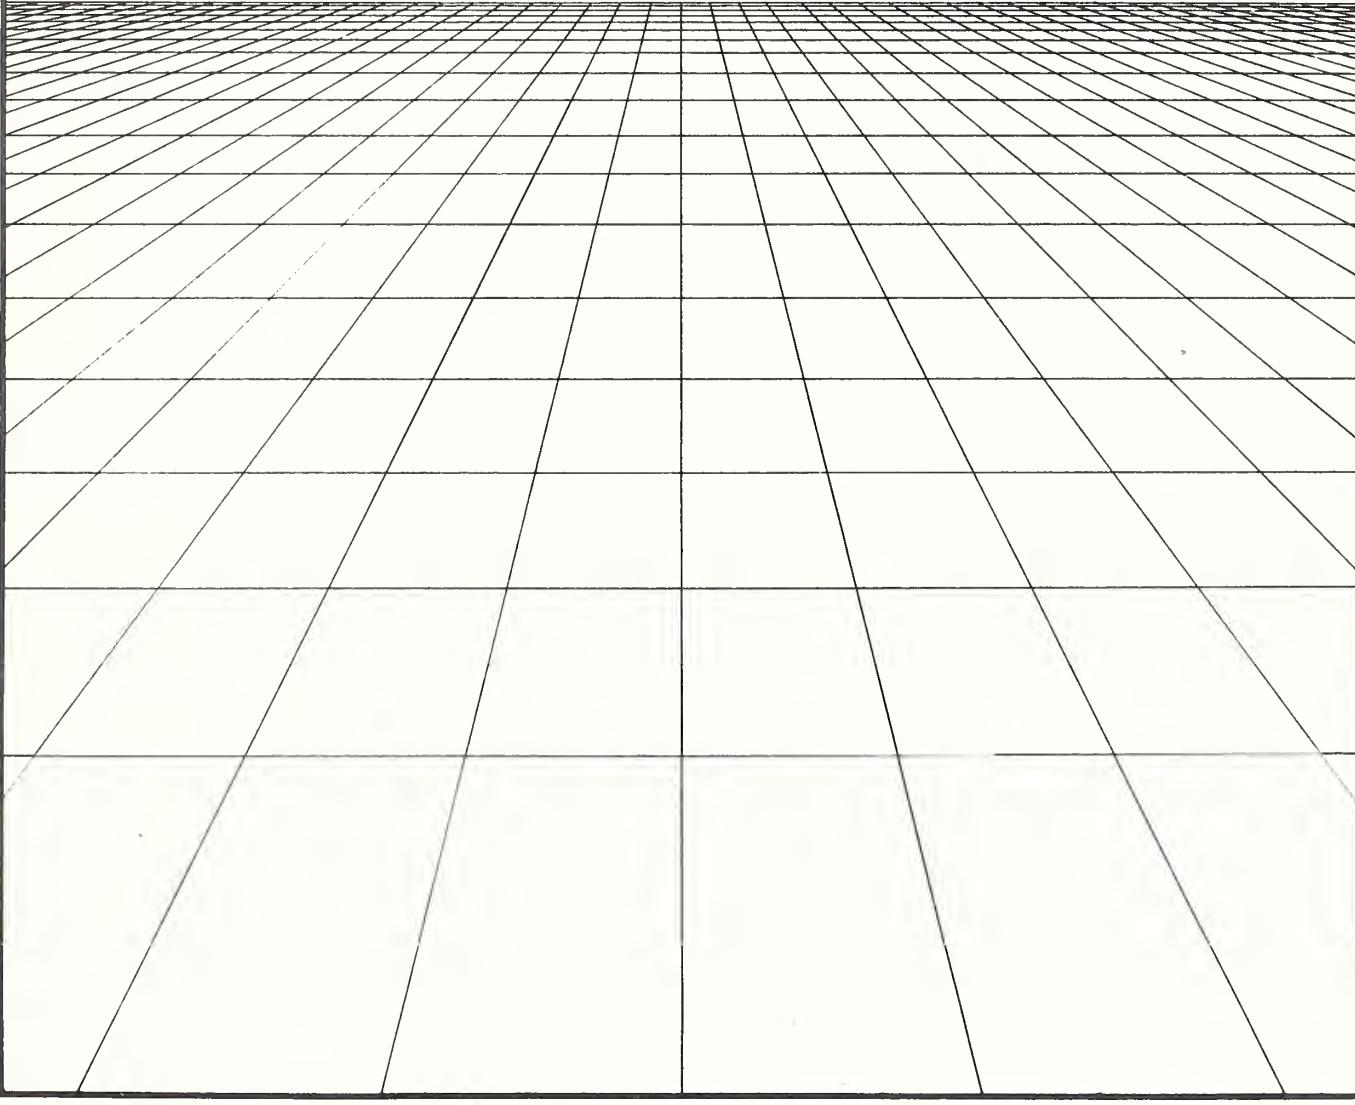

*The U.S. share of world trade in HVP's, chiefly processed and semiprocessed food products, stagnated at about 10 percent from 1970-80, while the EC share, with its exports growing by 20 percent per year in that decade, stood at five times the U.S. level.*

*For more information on the growing market in HVP exports and the not always friendly U.S.-EC competition, be sure to get "High-Value Agricultural Exports: U.S. Opportunities in the 1980's." See box for ordering information.*

#### **HOW TO ORDER**

For your copy of "High-Value Agricultural Exports: U.S. Opportunities in the 1980's" (GPO no. 001-000-04371-4), send \$4.50 in check or money order to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Make check or money order payable to Superintendent of Documents. Be sure to include the GPO number in your order. For faster service, call GPO's order desk at (202) 783-3238 and charge your purchase to your VISA, MasterCard, or GPO deposit account. Foreign addresses, add additional 25 percent.

# Economic Indicators of the Farm Sector series

# Economic Indicators of the Farm Sector series

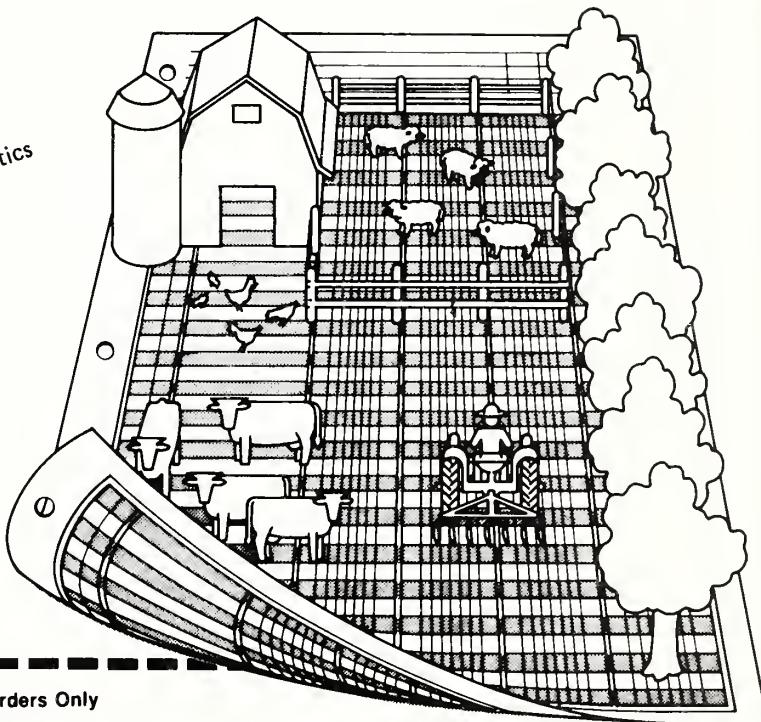

Keep tabs on farm income and expenses with the Economic Index Sector series. This series of five separate reports, offered now on a subscription basis, explores the economic status of U.S. farms to give you a comprehensive update on where U.S. agriculture is headed. The titles you will be receiving:

1. Crop Statistics  
2. Livestock Statistics

is series of  
the economic status of  
U.S. agriculture is headed.  
Here are the titles you will be receiving:

- Income and Balance Sheet Statistics
- State Income and Balance Sheet Statistics
- Farm Sector Review
- Production and Efficiency Statistics
- Costs of Production

# USDA Support for Exporters

Keep a step ahead of your competitors by getting the best government forecasts around on commodity-specific export potential through 1990 for selected countries in Africa, Asia, Latin America, and the Mideast.

**Export Market Profiles** is a series produced jointly by USDA's Economic Research Service and Foreign Agricultural Service. Each title in the series (approximately 20 titles in all) will highlight the production potential of one country's agricultural sector, major trade policies, and export potential for U.S. commodities.

The following titles in the **Export Market Profiles** series are now available; see highlights and ordering information below.

## **VENEZUELA.** 28 pp. \$1.75. GPO no. 001-000-04407-9.

U.S. is largest supplier of farm products . . . U.S. exports to go over \$1 billion by 1990 due to increasing population, rising incomes, and failure of ag sector to keep up with demand . . . Special market development needed.

## **BRAZIL.** 28 pp. \$1.50. GPO no. 001-000-04396-0.

Currently one of top 20 importers of U.S. ag products, but unlikely to remain so . . . Other exporters challenging U.S. . . . Market afflicted by growing debt, stagnant economy . . . Promotional activities could brighten picture for U.S.

## **HONDURAS.** 20 pp. \$1.50. GPO no. 001-000-04397-8.

Imports limited mostly to basic foods . . . Growth expected for imports of wheat, corn, oilseed meal, dried milk, beverage concentrates . . . Imports fueled by increasing population . . . Imports limited by poverty, high debt, sluggish economy, lack of foreign exchange.

## **CAMEROON.** 32 pp. \$2.00. GPO no. 001-019-00349-9.

Farm sector meets 80% of domestic food needs . . . Attractive market for increased U.S. exports due to urbanization and affluence . . . U.S. wheat, rice, fish, and tinned meats show greatest potential for increase . . . Poor transportation may limit marketing beyond major cities.

Also available in the **Export Market Profile** series . . .

**TAIWAN.** 96 pp. \$4.50 GPO no. 001-000-04345-5.

**DOMINICAN REPUBLIC.** 36 pp. \$3.50. GPO no. 001-000-04364-1.
